ADJUSTABLE HEAVY BAG HANGER

The Adjustable Heavy Bag Hanger is a unique add-on for your Sorinex rack or rig. The low profile bolt-on design maintains a minimal footprint, but maximizes the capability of your training space adding options for combatives, blocking, and hitting drills. Three adjustment angles allow for a variety of bag placements, while enabling space-saving storage when Hanger is not in use. Heavy Bag Hanger arms swivel smoothly across bronze bushings allowing free movement of the bag hanging underneath.

SPECIFICATIONS

LENGTH	22”
