

BATWING BAR

The Sorinex Batwing Chin Bar has been designed to bolt-on to any side of your rack, rig, or bridge. Wide, narrow and neutral grip orientations are integrated for a range of pull-up or chin-up variations. The ergonomic shape of the Sorinex Batwing Chin Bar brings the athlete into optimal overhead pulling positions protecting wrists and shoulders for safer and more efficient movement. The bar also serves as a high anchor point for TRX suspension trainers, rings, ropes, towels, or Fat Gripz supporting alternate movements or challenging an athlete's grip strength.
