

LOW ROW/FOOT PEG ATTACHMENT FOR FCC

The Low Row / Foot Peg Attachment is a retrofit item that adds Low Row capabilities and more to your existing Functional Cable Column (FCC). Simply remove existing bolts to access the mounting holes for the bracket. A pop pin secures the sliding adjustment with 8 different settings for varying heights or exercise modifications. Pegs fold down by lifting them to unlock and back up for space-saving storage when not in use. Perform seated low rows, kneeling abs by adding this attachment to your FCC.
